

INAKUSTIK

FOR THE SENSES
THERE'S MORE BEHIND IT.

A pure sound, a sharp picture and an exclusive feeling of luxury: This is our aim as a company: the best quality for the eyes and ears – for the senses. We have been committed to perfection for more than 37 years – in sound, picture, music & media and exclusive designs. To achieve this, we have retained our focus on in-house product development and the manufacturing of our top quality cables in Ballrechten-Dottingen. Part of this is our exceptional attention to detail – whether this involves the complex cable structures, the stylish spatial concept of AmbienTech or the selection of artists for our own music label. It is this emphasis on the fundamental aspects which has made in-akustik so strong and helped us become a globally active company with international ambition with a hugely impressive product range.

Our philosophy:
no voodoo just work on the
smallest of details

Cables & Accessories

Perfect sound and perfect pictures are a question of harmony. Without high-quality cables, the best electronics are worthless. Cables and connections are vulnerable to faults that can only be cured by knowhow. We at in-akustik take care of the technical details. We use the most sophisticated technology, the best materials and the most elegant architecture.

Essentially, we pursue one aim: Anything that has been recorded, mixed and produced with the highest quality must be played back without loss to ensure the highest level of enjoyment. We beat background noise and master monotony. We see ourselves as clearing the path for perfect signal transmission and as the conveyors of nuances that appeal to our eyes and ears. Recordings with

the highest standards, perfect data storage media, CD- and Blu-ray-players, amplifiers and speakers are all precisely tuned to each other. However, on the way from electronics via the amplifier to the speakers the dynamics are suppressed, high frequencies disappear, never to be heard again, and in the end even the bass grumbles saplessly away. The difficult physical phenomena, which occur when transporting signals, can only be kept under control with the finest technical finesse and the best materials. That is in-akustik's true passion: No voodoo, no dressing up, just work on the smallest of details using the best materials.

Made in Germany

We don't know where others acquire their cables. For our part, we manufacture our speaker cables here in Germany. And most of our home hi-fi and video cables in the Reference and Excellence quality classes are manufactured by in-house production plants at company headquarter in Ballrechten-Dottingen. Look for the "Made in Germany"-sticker on our packaging.

AmbienTech –THE SPATIAL CONCEPT

AmbienTech gets more out of buildings, houses and rooms where people live, work, eat and shop. It is a spatial concept that is ideal for private homes and commercial use. It offers new dimensions for interior design. You can look forward to more style, flair and personal space.

PROFESSIONAL HDMI & HD-BASE-T installation

The range of multimedia products from in-akustik offers you a wide spectrum for fixed multimedia installations in your home. The range consists of various panel jacks and covers for easily integrating video and audio connections in known switch systems. For ambitious video installations in the home as well as for professional use, we are offering a new professional HDMI installation range which focuses on transporting HDMI signals without loss over cable distances of up to 100 metres.

MUSIC AND MEDIA

As one of the largest independent labels in Germany, we have high standards, especially when it comes to our unique range of music & media. We offer you rock and pop, jazz and classical, blues and singer/songwriters, as well as studio recordings for audiophiles, legendary concerts on DVD and Blu-ray and cult television series.

Press reviews:

"This equipment is among the very best that loudspeaker manufacturers have created" (FAZ | Master Line Source)

"Those who enjoy hearing musicians play and great sound detail and are not willing to buy large loudspeakers to attain a great sound, are perfectly catered to by Piega." (stereoplay | Coax 90.2)
